

MUHAMMED FAYIS

PROJECT PLANNING & MANAGEMENT ENGINEER

Location: Dammam, Eastern Province, Saudi Arabia

Email: Muhdfayishere@gmail.com

Phone: +966 596110525 / +966 507220185

Experience: 5+ Years in Industrial & Infrastructure Projects

PROFESSIONAL SUMMARY

Experienced Project Planning and Management Engineer with 5+ years of dedicated experience in project management, baseline planning, execution, and scheduling of large-scale structural steel fabrication, seawater desalination plants, and sewage water treatment plant (SWTP) projects. Proven expertise in multidisciplinary coordination, Primavera P6 scheduling, QA/QC documentation, change order management, resource allocation, delay impact analysis, and Extension of Time (EOT) claims.

PROFESSIONAL EXPERIENCE

PROJECT MANAGEMENT ENGINEER BENA Steel Industries • Dammam, Saudi Arabia - Overseeing end-to-end project management, fabrication scheduling, and site delivery for heavy structural steel and industrial infrastructure works. - Driving multidisciplinary engineering coordination across design, detailing, procurement, fabrication workshops, and site erection teams. - Tracking project milestones, resource leveling, risk matrices, and executive dashboard reporting to ensure on-schedule handover. - Enforcing rigorous QA/QC documentation compliance, ITP adherence, and industry safety standards across all active fabrication packages.	2025 — PRESENT
PLANNING ENGINEER Acciona Agua • Saudi Arabia - Developed and managed baseline project schedules in Primavera P6 for major desalination and water infrastructure utility installations. - Monitored Critical Path Method (CPM) activities, calculated schedule variances, and formulated proactive recovery strategies. - Formulated comprehensive daily, weekly, and monthly progress reports and S-curve analytical dashboards for executive stakeholders and clients. - Analyzed potential delays, assisted in preparing Extension of Time (EOT) claim justifications, and processed engineering change orders.	2024 — 2025
PROJECT ENGINEER Wasalat Fabrications & Services • Saudi Arabia - Directed engineering operations, site fabrication, and mechanical erection across heavy industrial and utility plant facilities. - Monitored the fabrication and installation of 7,000+ Linear Meters (LM) of pipelines for plant utilities and infrastructure facilities. - Coordinated subcontractor teams, verified material compliance, interpreted engineering drawings, and managed site variations. - Supervised QA/QC inspection routines, hydrostatic testing documentation, and non-conformance rectification.	2022 — 2024
SITE ENGINEER Al Zayan Construction • Kerala, India - Supervised on-site construction works, structural execution, and technical alignment with structural and architectural drawings. - Handled subcontractor work allocations, daily material consumption logs, and site quality assurance inspections. - Enforced strict on-site occupational health and safety compliance standards.	2020 — 2021

TECHNICAL & PROFESSIONAL COMPETENCIES

PROJECT MANAGEMENT - Primavera P6 Scheduling - MS Office Suite (Excel, Word, PPT) - Project Reporting & Dashboards - Baseline Planning & CPM Tracking - Change Orders & EOT Claims	ENGINEERING & CAD - Navisworks Review & Clash Check - AutoCAD (Basic Drawing Interpretation) - Technical Drawings Interpretation - Fabrication Shop Drawings Review - Multidisciplinary Coordination	QUALITY & COMPLIANCE - QA/QC Documentation & ITPs - Safety Compliance (HSE Protocols) - Non-Conformance Reporting (NCR) - Subcontractor Management - Desalination & SWTP Systems
